- Behavioral Health
- Mentored Internship Program

What is Behavioral Health?

Behavioral Health addresses both our mental and emotion well-being by preventing or intervening in mental illness as well as substance abuse or other addictions

Learning Opportunities

Mentors will provide a high quality, consistent, structured educational and training experience to prepare future Behavioral Health professionals in an Integrated Behavioral Healthcare system. Students will be exposed to multiple treatment approaches and modalities to best serve the needs of patients with mental health and/or substance use diagnosis. Students will spend their time working on relevant projects, learning about the Behavioral Health field, making industry connections, and developing both hard and soft skills. Students will have an opportunity to observe and/or develop professional competence in assessment, intervention, consultation and crisis management.

Areas of Focus

- Behavioral Health Consultants (BHC)
- Behavioral Health Care Coordinator (BHCC)
- Drug and Alcohol Counselors (CDAC)
- Case Managers
- Peer Support Specialist
- Project Coordinator
- Homeless Outreach
- Early Intervention Services (EIS)
- Intensive Outpatient Services
- Enhanced Care Management (ECM)
- Medicated Assisted Treatment (MAT)

About Us

Shasta Community Health Center is a Federally Qualified Health Center (FQHC) serving the underserved, low-income and most vulnerable patients in Shasta County. It served 34,800 patients in 2021, with 3,600 of these patients being homeless. Over 92% of our patients live below the Federal Poverty Level, with over 64% of patients being Medi-Cal recipients.

Shasta Community Health Center, working with private and public health partners, and by leveraging and efficiently using its limited resources, will help create a seamless system of access to compassionate, high quality, cost-effective primary and preventative health care for all residents in the community it serves.
